Add these skills to access higher-paying jobs:

You are 1 to 2 skills away from qualifying for jobs **up to $35/hr**

Fall Prevention *Unlocks jobs paying ~$28–$35/hr*

Near You

Tritton Community College 4.2 miles away	Fall Prevention / Patient Safety Training
City Colleges of Chicago 6.8 miles away	Nursing Assistant Program (includes fall prevention)

view more →

Online

Coursera	Fall Prevention Certification
Udemy	Elderly Care & Fall Prevention

view more →

Patient Mobility *Common in jobs paying ~$26–$32/hr*

Near You

Weston College	Patient Mobility Certification

Note:
⚠️ Critical UX rule:

👉 Always show something
If no local options: Hide “Near you”
Show only:“💻 Online options (available immediately)”
Never show and empty state

How to implement (simple MVP logic)

Step 1: Store training locations
Each training entry should have:
- School Name
- Type (online / in-person)
- ZIP code or city
- Skill tag (e.g., “Fall Prevention”)

Step 2: Distance logic
For in-person:
Compare user ZIP vs training ZIP
Show within 10–25 miles (start simple)
You don’t need perfect geolocation yet

Step 3: Sort order
For each skill:
Nearby in-person (closest first)
Online options

If you do this right, you’re building:
a location-aware upskilling engine
Which means:
Not just “what to learn”
But where to go to level up

That’s something:
Indeed doesn’t do well
LinkedIn doesn’t do at all
